ÍNDICE

Contenido	Página
A. GENERALIDADES Y PRINCIPALES COMPONENTES	1
Capítulo I. Definiciones y características esenciales	2
I.1 Introducción	2
I.2 Formación de película	4
I.3 Propiedades generales de una película de pintura	6
I.4 Clasificación de las pinturas	9
I.5 Medios de exposición	18
I.6 Aspectos técnico-económicos	19
 Capítulo II. Materiales formadores de película	 21
II.1 Introducción	22
II.2 Ligantes naturales	23
II.3 Ligantes naturales modificados	36
II.4 Resinas tipo poliéster	46
II.5 Acrilatos curados por radiación	55
II.6 Resinas alquídicas	57
II.7 Resinas acrílicas	67
II.8 Condensados de formaldehído	73
II.9 Resinas vinílicas	84
II.10 Caucho sintético	88
II.11 Resinas epoxídicas	91
II.12 Resinas poliuretánicas	103
II.13 Silicatos orgánicos e inorgánicos	110
II.14 Resinas de silicona	117
 Capítulo III. Pigmentos funcionales y extendedores	 124
III.1 Introducción	125
III.2 Clasificación de los pigmentos	126
III.3 Propiedades de los pigmentos	127
III.4 Interacción con el medio	134
III.5 Tipos de pigmentos	136
 Capítulo IV. Aditivos	 175
IV.1 Introducción	176
IV.2 Modificadores de la tensión superficial	176
IV.3 Agentes secantes	192
IV.4 Estabilizadores de la luz	193
IV.5 Biocidas	196
IV.6 Agentes mateantes	206
IV.7 Inhibidores de la corrosión en el envase	206
IV.8 Inhibidores instantáneos de la corrosión de sustratos ferrosos	206
IV.9 Aditivos reológicos	207

Capítulo V. Disolventes y diluyentes	223
V.1 Definiciones y clasificación	224
V.2 Caracterización de los solventes	226
V.3 Solventes en pinturas	229
V.4 Principales propiedades de los solventes	232
V.5 Generalidades sobre seguridad	241
 B. RELACIÓN PIGMENTO/MATERIAL FORMADOR DE PELÍCULA	 243
Capítulo VI. Formulación de pinturas base solvente orgánico	244
VI.1 Introducción	244
VI.2 Concentración de pigmento en volumen (PVC) y valor crítico	244
VI.3 Variables que influyen sobre la CPVC	246
VI.4 Índice de absorción de aceite	254
VI.5 PVC y propiedades de la película seca	256
VI.6 La PVC reducida como variable de formulación	258
 Capítulo VII. Formulación de látices	 260
VII.1 Introducción	261
VII.2 CPVC de látices: influencia de diferentes variables	262
VII.3 Determinación de la posición de la CPVC	267
VII.4 Formación de grietas en la película	268
VII.5 Formulación de pinturas para interiores y exteriores	268
 C. MANUFACTURA DE PINTURAS	 272
Capítulo VIII. Dispersión de pigmentos	273
VIII.1 Introducción	273
VIII.2 Tensión superficial e interfásial	273
VIII.3 Medición de la tensión superficial de líquidos	276
VIII.4 Determinación de la tensión superficial de sólidos	279
VIII.5 Evaluación de la rugosidad de superficies sólidas	281
VIII.6 Humectación de las partículas de pigmento	282
VIII.7 Trabajo de humectación	289
VIII.8 Trabajo de floculación	294
VIII.9 Reología de la dispersión de los pigmentos	296
 Capítulo IX. Estabilidad de las dispersiones	 299
IX.1 Introducción	300
IX.2 Estabilidad de las dispersiones	300
IX.3 Fuerzas de atracción y de repulsión en los sistemas dispersos	302
IX.4 Estabilización de la dispersión	307
IX.5 Consideraciones sobre el agente dispersante	313

Capítulo X. Molinos para la dispersión de los pigmento	317
X.1 Introducción	318
X.2 Selección de molinos	318
X.3 Molino de cilindros o de tres rodillos	320
X.4 Molino de bolas	322
X.5 Molino de arena o de perlas	329
X.6 Dispersoras de alta velocidad	335
 Capítulo XI. Control y prevención de la contaminación del medio ambiente en la producción de pinturas	342
XI.1 Diseño de proyecto de ingeniería ambiental	343
XI.2 La evolución de la contaminación ambiental	344
XI.3 Clasificación de los residuos industriales	344
XI.4 Generación de residuos en la industria de la pintura	345
XI.5 Fabricación de pinturas y etapas de generación de residuos	347
XI.6 Prevención y control de la contaminación durante proceso	349
XI.7 Tratamientos y tecnologías anticontaminantes	363
 D. FALLAS DE LA PELÍCULA Y CONTROL DE CALIDAD	375
Capítulo XII. Fallas en películas de pintura	376
XII.1 Introducción	376
XII.2 Selección del sistema de pinturas	377
